

VARUN N

Full Stack Developer & Data Analytics | PHP | MERN Stack | Python | SQL | Data Visualization

+91 76195 89533 | varunraj0514@gmail.com | Bengaluru, Karnataka | [linkedin.com/in/varun-n-07ba69395](https://www.linkedin.com/in/varun-n-07ba69395) | github.com/vr051688-collab

PROFESSIONAL SUMMARY

Full Stack Development intern and BCA graduate with hands-on experience across PHP/MySQL and the MERN stack, including a full-featured payroll system with JWT authentication, RBAC, automated payroll computation, and an analytics dashboard built on MongoDB aggregation pipelines. Combines end-to-end web development skills with a strong analytical foundation in Python (Pandas, NumPy, Scikit-learn), SQL, and data visualization, reinforced by Deloitte, BCG X, and Tata Group data analytics/data science job simulations, and currently applying these skills as an E-Governance Data Analyst Specialist intern.

CORE COMPETENCIES

PHP | MySQL | JavaScript | React.js | Node.js | Express.js | MongoDB | REST APIs | JWT Auth & RBAC | Python (Pandas, NumPy, Scikit-learn) | SQL | Data Visualization (Recharts, Tableau) | Excel | Database Schema Design | Automated Testing (Jest, Supertest) | Git & GitHub | Agile Development

EXPERIENCE

E-Governance Data Analyst Specialist Intern (Remote) - YuvaIntern | Jul 2026 - Present

- Analyze government service and digital initiative data using Excel and Tableau, surfacing trends that inform e-governance decision-making.
- Partner with cross-functional stakeholders to turn raw data analysis into clear, actionable recommendations for improving e-governance service delivery.

Full Stack Development Intern - Harshan Digitech | Feb 2026 - May 2026

- Completed an intensive Web Designing & Development training program (E-Max Council for Vocational Training & Education) covering HTML, CSS (Advanced), JavaScript (Advanced), Bootstrap, and Web Templates, graduating with an 82% (A grade).
- Translated training into independent, production-style builds - the PHP/MySQL Payroll Management System and E-Commerce Website - going beyond coursework to ship working applications alongside the program.

PROJECTS

Payroll Analytics Dashboard - Data Analytics | MERN Stack (Node.js, Express, MongoDB, React/Vite) | Jun 2026 - Jul 2026

- Built a full-stack payroll system: employee records, attendance tracking, and automated payroll generation (Basic + DA + HRA + allowances - PF - tax - loss-of-pay).
- Implemented JWT auth with role-based access control (admin/employee), first-account admin lockdown, and safeguards against privilege escalation via request-body role injection.
- Hardened the API against NoSQL injection and IDOR: sanitized inputs, regex-escaped search, rate-limited auth endpoints, and a mandatory 32+ character JWT secret with no insecure default.
- Built an analytics dashboard (Recharts) across a 150-employee dataset, with KPI summaries, department-wise cost and profit statistics, and monthly trend charts via MongoDB aggregation pipelines.
- Wrote a 35+ test Jest/Supertest suite (with mongodb-memory-server) covering payroll math, auth, RBAC/IDOR checks, and injection protections, with coverage reporting.

Code: github.com/vr051688-collab/payroll-analytics-dashboard

Live Demo: payroll-analytics-dashboard.vercel.app

Paynova - MERN Stack | Company & Employee Analytics Platform

- Built a company analytics platform tracking employee salary data alongside department-wise cost and profit metrics.
- Designed data models to link employee records to departments, enabling salary, cost, and profitability breakdowns by department.
- Built with the MERN stack (MongoDB, Express, React, Node.js), deployed with a live login-based demo.

Code: github.com/vr051688-collab/paynova

Live Demo: paynova.netlify.app

Payroll Management System - PHP | MySQL | Feb 2026

- Built a PHP/MySQL system to manage employee records, salary structure, DA, and other compensation details, with separate admin and employee panels.
- Implemented admin-side CRUD for employees plus payroll generation and payroll history views.

E-Commerce Website - Online Jewelry Store - PHP | MySQL | HTML/CSS | JavaScript | Feb 2026 - Jun 2026

- Built a PHP/MySQL e-commerce platform with a 40-product catalog, shopping cart, and checkout flow, backed by a relational schema for listings, categories, and orders.
- Implemented dynamic front-end pages using PHP, HTML, CSS, and JavaScript for a responsive shopping experience.

CERTIFICATIONS & JOB SIMULATIONS

Deloitte - Data Analytics Job Simulation (Forge), Feb 2026 | BCG X - Data Science Job Simulation (Forge), May 2026 | Tata Group - GenAI-Powered Data Analytics Job Simulation (Forge), Jun 2026

Additional simulations: Wells Fargo (Technology) | Datacom (Software Engineering) | SAP (Analytics Cloud Planning) - 6 total

Coursework: Infosys Springboard (Deep Learning for Developers, Intro to Data Science) | IndiaAI/TCS iON - YUVA AI For All | KR Nexus - Full-Stack Tech Assessment (Participant)

EDUCATION

Bachelor of Computer Applications (BCA) - Government First Grade College, Chikkaballapur - Bangalore University | 2023 - 2026

CGPA: 8.74 / 10 | NEP Curriculum | Relevant Coursework: Database Management Systems, Data Structures & Algorithms, Statistics for Computing, Python Programming, Software Engineering
